The Chrysler 300-E is a car of mood and movement, of quality and comfort and uncompromised taste. It is without question one of the world's most desirable automobiles. In total, it provides a greater measure of power, spaciousness, roadability, driving ease, richness of interior and modern beauty than any car, however costly, being made today.

The performance potential of the 300-E startles even the experts! From lessons learned on some of the world's most famous road racing courses . . . Spa-Francorchamps in Belgium, le Mans in France and Watkins Glen in the U. S. . . . comes the robust 413 cubic inch V-8 which powers it for 1959. Delivering a full 380 horsepower, this brilliant engine can run cool and confident, hour after hour, at peak RPM's. Its power reserve is vast. Dual 4-barrel carburetors and high lift cam work in conjunction with a modified TorqueFlite transmission and special 3.31 rear axle ratio. The result is an acceleration figure astonishing for a car of such size and weight.

The 300-E chassis has also received careful consideration and change. Suspension, fore and aft, has been altered, enabling this luxury automobile to corner with agile precision. Its power steering is light and sensitive in the sports car tradition. Only 3½ turns are required from lock-to-lock.
